

A40B-CAL/LC | 串联两台分流器进行测量的大电流适配器 (LC 到 LC)

产品概述: A40B-CAL/LC | 串联两台分流器进行测量的大电流适配器 (LC 到 LC)

The high current adapter is used when calibrating the A40B shunts at current levels of more than 2 A. It connects together the current source and two shunts for calibration measurements. This adapter uses LC connectors. In this configuration, a certified or reference shunt is connected in series with a shunt that is being calibrated, which in turn are in series with a current source.
